Baron Lizza, in his celebrated work on Anima Chen istry, says: "An artificial Digestive Fluid, analagou," to the Gastric Juise, may be readily prepared from the mucuous membrane of the atomach of the call, in which various articles of food, as meat and eggs, will be so softened, changed and

Dr Prakira, in his famous tratise on "Food and Diet," published by Fowlers & Wells, New York, page 36, states the same great fact, and describes he method of preparation. There are few higher

authorities than Dr. Pereira.
Dr Comme, in his valuable writings on the hysology of Digestion, observes that "a dimunitation of the due quantity of the Gastric Juice is a prominent and all-prevailing cause of Dyspepsia; and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail, had recourse to the Gastric Juice, obtained from the stomach of living animals, which proved com-Dr Granam, author of the famous works on

Dr Simon's great work, the "Chemistry of Man," (Lea & Blanchard, Phila, 1846, pp 321-2) says:— The discovery of PEPSIN forms a new era in the themical history of Digestion. Professor Dunglison, of the Jefferson College, hitadelphia, in his great work on Human Physilogy, devotes more than fifty pages to an examina-ion of this subject. His experiments with Dr Seaumont, on the Gastric Juice, obtained from the living human stomach and from unimals, are well known. "In all cases," he says, "digestion occurred as perfectly in the artificial as in the natu-
